Note: Ratios recalculated daily using live adjusted close price with FY2023 fundamentals. As price moves, P/E, P/S, P/B, EV/EBITDA update in real-time. Shareholder Yield uses annual dividend + buyback data.

Methodology

Daily prices sourced from EODHD (adjusted for splits and dividends). Fundamentals from Sharadar/Nasdaq Data Link (most recent annual filing).

Ratios are recalculated each day: Market Cap = Adj Close $\times$ Shares Outstanding. Then P/E = MCap/NetIncome, P/S = MCap/Revenue, P/B = MCap/Equity, EV/EBITDA = (MCap+Debt-Cash)/EBITDA.

This demonstrates that the VC2 ranking changes daily as prices move, even though fundamentals update quarterly/annually. The system re-ranks every stock every day using the latest price against the most recent reported fundamentals.
